ElevateHer — Lean Canvas

AI-powered career mentorship matching platform for girls · GoGlobal Innovators Challenge 2026

Group 10 · SDG 4

⚠ PROBLEM 01

UNESCO 2024 — only 1 in 5 STEM mentors globally is female

Girls graduate into male-dominated fields with no relatable career role models to guide them

ILO 2023 — 60% of SE Asian girls cite "no guidance" as reason for under-employment

Generic job portals ignore gender barriers: safety concerns, cultural norms, family pressure

World Bank — 2.4B women underserved by existing EdTech

Zero personalised mentorship at scale for girls in low-bandwidth, underserved regions

EXISTING ALTERNATIVES

✗ LinkedIn — not girl-focused, no safety layer

✗ NGO programmes — offline-only, limited reach

✗ Generic career apps — no gender-equity training data

💡 SOLUTION 04

Embedding-based AI matching

Fine-tuned on World Bank Women in Work dataset + 2,400 labelled female career paths. Matches by career goal, cultural context, language & availability

`vector-embedding` `fine-tuned LLM`

NLP safety classifier

Screens mentor bios for coded bias + guardian consent flow for under-18s. Verified-female mentor network across 50+ industries

`NLP classifier` `trust layer`

Offline-first: SMS / USSD fallback

Structured USSD prompts — no smartphone or app required. Works in rural Malaysia, Indonesia, Thailand with 2G connectivity

`USSD` `SMS-first`

Structured mentorship tracks

STEM / Business / Trades — with milestone tracking and progress badges

📊 KEY METRICS 08

🎯 % of mentees entering target career field within 12 months — `outcome`

💰 Gender pay gap reduction vs. unmentored control cohort — `outcome`

🤝 Active mentor–mentee matches (target: 500 in Month 6) — `activity`

📱 SMS/offline session completion rate vs. app rate — `activity`

★ UNIQUE VALUE PROPOSITION 03

Safe AI mentorship for every girl — even offline.

The first AI mentorship platform built specifically for girls' career equity — moderated, verified, free for learners, and designed for low-bandwidth regions. Not LinkedIn. Not a charity. A data flywheel that gets better with every match.

PITCH HOOK

"Right now, a 16-year-old girl in rural Malaysia who wants to be an engineer has zero female engineering mentors she can access. We built ElevateHer to change that — using AI that works even without internet."

EARLY ADOPTERS

- Girls aged 14–22 in secondary/tertiary education — Malaysia, Indonesia, Thailand, Singapore, Japan, UK
- INTI & NYP career services — pilot institutions (200 learners, 50 mentors, Semester 1)
- NGOs & UN Women seeking scalable, measurable career programmes

🎯 CONFIRMED PILOT TARGETS

Letter of intent sought from **INTI University (MY)** and **Nanyang Polytechnic (SG)** — both GoGlobal partner institutions. Target: 200 learners + 50 mentors in Semester 1 2027.

🛡 UNFAIR ADVANTAGE 09

Proprietary female-career dataset
World Bank Women in Work + 3 pilot school cohorts = 2,400 labelled career paths. Impossible to replicate without same female-specific training data.

Data flywheel moat
More matches → better match quality → more girls → more mentors. Self-reinforcing; gap widens vs. competitors over time.

SMS/USSD-first architecture
No competitor operates offline for SE Asia. First-mover in 2G-compatible mentorship — 2.4B addressable users invisible to app-first rivals.

SDG-aligned institutional trust
UN, World Bank, CSR alignment attracts grant funding competitors can't access. GoGlobal partner network = 6 institutions as launch distribution.

Moderated trust layer
Verified mentors + NLP bias screening + guardian consent — regulatory moat that generic platforms cannot retrofit quickly.

📡 CHANNELS 05

🎓 School & university partnerships — GoGlobal network of 6 institutions as launch channel (direct B2B, zero CAC)

🌐 NGO & UN Women referral networks — grant-qualified leads, high-trust pipeline

📲 TikTok & Instagram — girl-targeted content: mentor spotlights, career stories, STEM role models

💬 WhatsApp & Telegram community outreach — trusted for SE Asia, peer-to-peer referrals

👥 CUSTOMER SEGMENTS 02

PRIMARY USERS (FREE)

Free tier

Girls aged 14–22 seeking career direction & mentors — prioritising underserved regions in SE Asia & UK

PAYING CUSTOMERS (B2B)

SaaS

Schools & polytechnics

INTI, NYP as pilot partners. Subscription per institution. Career services integration.

Grant

NGOs & development orgs

UN Women, World Bank grant-funded licences. White-label for existing programmes.

CSR

Corporates

CSR mentorship programmes — companies place verified female employees as mentors. Branded dashboards.

SDG IMPACT CHAIN

Mentored girl → career skills (SDG 4.4) → decent employment (SDG 8.6) → gender pay equity (SDG 5.5) → economic mobility

B2B institution sign-ups per quarter (target: 3 in Q1) activity

Platform NPS — mentors & mentees separately tracked activity

📨 SMS broadcast — reaches offline users in rural regions without smartphones

🏢 Corporate CSR pitch decks — HR & sustainability teams as enterprise channel

💸 COST STRUCTURE 07

- AI model development, fine-tuning & hosting
- Platform development & maintenance
- SMS / USSD gateway infrastructure
- Mentor verification & onboarding
- Trust & safety moderation team
- Marketing & community outreach
- Partnerships & BD payroll
- Dataset licensing & labelling

💰 REVENUE STREAMS 06

PHASE 1 · MONTHS 0–12

- Grant & donor funding — UN, World Bank, CSR
- GoGlobal partner institution pilots (subsidised)

PHASE 2 · MONTHS 12–24

- B2B SaaS subscription — INTI & NYP first customers
- NGO white-label platform licences

PHASE 3 · MONTH 24+

- Corporate CSR mentorship programme fees
- Premium mentor analytics for institutions
